The following is a list of stores known to have been taken south on *Nimrod*. It is compiled from *The Heart of the Antarctic*, photographs and manuscript diaries held by La Trobe Library, Melbourne (Captain JK Davis papers), and by the Scott Polar Research Institute, Cambridge, United Kingdom. Reference is made to what is in the hut today when it is certain the item is associated with the 1907–09 expedition. Information is awaited on manuscripts held in Adelaide, Sydney and London. Further to these archives, there is a diary of Frank Wild that requires research.

PROVISIONS

It is not possible to state exactly what was stored in Shackleton's hut. Shackleton does mention that products such as fruit and pickles, and also the stock of wines, were stored in the hut. However, Marshall recorded that bottled fruits were stored beneath the hut, although he may have been referring to jars of salt stored outside. There is no record available of other products kept in the hut and, for the purpose of this appendix, remaining items are considered as being kept outside and drawn on as required.

The following list comprises the food supplies purchased in England and shipped 20 August and 3 September 1907 to JJ Kinsey (Shackleton's agent) in Christchurch, New Zealand. Of this, some supplies were retained in Christchurch to be sent south on the second voyage.

This list is more complete than that published by Shackleton in *The Heart of the Antarctic*, in which some variation occurs. Importantly, in this list, suppliers are noted where known.

In addition to the above canned meat, Canterbury farmers donated 32 live sheep. These were taken south on *Koonya* which towed *Nimrod* to the Antarctic Circle. The sheep were then killed and transferred to *Nimrod* by a line. Ten carcasses were washed away; the others were hung in the rigging. Marshall recorded that fresh meat was frequently consumed.
